**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

	<p>refineries were buried beneath the backyards of several homes in the tract prior to residential development.</p> <p>Not reported</p> <p>Petroleum sludges and acidic wastes were believed to have been disposed of during the 1930's through the 1950's when the site was owned by the Murdy Dairy Property and Ralph Gray Trucking Company. Reports indicate sketchy, conflicting historical information which describes between one to four original sumps where waste material was disposed. During development of the housing tract in 1959, the wastes were excavated and redispersed into two discrete locations along backyard fence-lines during the final construction of the homes. The buried wastes have been found seeping into the surface of the yards within the tract. A sampling of the buried and seeping materials have shown them to be composed of petroleum hydrocarbons, polynuclear aromatic hydrocarbons (PNAs), and volatile aromatic hydrocarbons, including benzene. The substances have been found to be acidic, having a pH generally less than 2.0. The wastes have also been found emitting low levels of volatile aromatic hydrocarbon vapors and sulfur dioxide and hydrogen sulfide gases, creating unpleasant odors.</p> <p>Not reported</p> <p>A site investigation in Summer, 1987 verified the presence of waste materials beneath residential yards. Although the investigation showed that the levels of vapors emitted from the wastes do not pose an immediate health hazard, the long-term health effects are uncertain. The investigation suggests, but does not confirm, that wastes are not migrating to groundwater. There is a periodic threat of direct contact posed by the acidic waste materials seeping into backyards.</p> <p>Not reported</p> <p>Preliminary site investigative activities and removal actions to remove seepage material from the yards were completed in November 1987.</p> <p>Comments Date: 01011988</p> <p>Comments: This is the date the site was first listed AWP pursuant to</p> <p>Comments Date: 01011988</p> <p>Comments: Section 25356.</p> <p>Comments Date: 01121996</p> <p>Comments: The Removal Action for the Ralph Gray Trucking Company</p> <p>Comments Date: 01121996</p> <p>Comments: Superfund Site was completed under the oversight of DTSC.</p> <p>Comments Date: 01121996</p> <p>Comments: Activities included the excavation and offsite disposal of</p> <p>Comments Date: 01121996</p> <p>Comments: 59,493 tons of buried hazardous wastes and associated con-</p> <p>Comments Date: 01121996</p> <p>Comments: taminated soil from a residential neighborhood in Westmin-</p> <p>Comments Date: 01121996</p> <p>Comments: ster.
